

Item 2.02 Results of Operations and Financial Condition.

On July 28, 2023, Imperial Oil Limited (the "company" or "Imperial") by means of a press release disclosed information relating to the company's financial condition and results of operations for the fiscal quarter ended June 30, 2023. A copy of the press release is attached as Exhibit 99.1 to this report and incorporated herein by reference.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following exhibit is furnished as part of this report on Form 8-K:

- 99.1 News release of the company on July 28, 2023 disclosing information relating to the company's estimated second quarter financial and operating results for the fiscal quarter ended June 30, 2023.
- 104 Cover Page Interactive Data File (embedded within the Inline XBRL document).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

IMPERIAL OIL LIMITED

Date: July 28, 2023

Calgary, July 28, 2023
Exhibit 99.1

Imperial announces second quarter 2023 financial and operating results

- Quarterly net income of \$675 million and cash flow from operating activities of \$885 million
- Successful completion of planned turnaround activities at Kearl, Syncrude and Strathcona refinery
- Upstream production of 363,000 gross oil-equivalent barrels per day
- Refinery throughput of 388,000 barrels per day and capacity utilization of 90%
- Commenced facility construction on the Strathcona Renewable Diesel project
- Renewed annual normal course issuer bid (NCIB) to repurchase up to 5% of outstanding common shares, with plans to accelerate completion of the program prior to year end
- Declared third quarter dividend of 50 cents per share

millions of Canadian dollars, unless noted	Second quarter			Six months		
	2023	2022	Δ	2023	2022	Δ
Net income (loss) (U.S. GAAP)	675	2,409	(1,734)	1,923	3,582	(1,659)
Net income (loss) per common share, assuming dilution (dollars)	1.15	3.63	(2.48)	3.29	5.36	(2.07)
Capital and exploration expenditures	493	314	+179	922	610	+312

Imperial reported estimated net income in the second quarter of \$675 million, compared to net income of \$1,248 million in the first quarter of 2023, driven by lower refining margins and planned turnaround activity. Quarterly cash flow from operating activities was \$885 million, up from \$821 million used in the first quarter of 2023.

“Imperial’s results in the second quarter reflect the safe and on-plan execution of significant turnaround activity across our Upstream and Downstream business lines,” said Brad Corson, Imperial’s chairman, president and chief executive officer. “With substantial turnaround activity now behind us, we anticipate strong production in the second half of 2023.”

Upstream production in the second quarter averaged 363,000 gross oil-equivalent barrels per day. At Kearl, quarterly total gross production averaged 217,000 barrels per day (154,000 barrels Imperial’s share), primarily impacted by planned turnaround activity. In April, Kearl took delivery of its first-ever shipment of renewable diesel for use in its mine fleet as part of the company’s ongoing efforts to reduce emissions and demonstrate suitability for use in heavy equipment applications. At Cold Lake, quarterly gross production averaged 132,000 barrels per day, impacted by the timing of production and steam cycles. At Syncrude, the company’s share of quarterly production averaged 66,000 gross barrels per day, primarily impacted by its annual coker turnaround.

In the Downstream, throughput in the quarter averaged 388,000 barrels per day with refinery capacity utilization of 90 percent, reflecting the impact of the planned turnaround at the Strathcona refinery. Petroleum product sales in the quarter were 475,000 barrels per day. In May, the Strathcona Renewable Diesel project passed a significant milestone with key contractors being mobilized to site to commence facility construction work.

“We support Canada’s vision for a lower-emission future, and I am encouraged to see the work now underway to build Canada’s largest renewable diesel facility,” said Corson. “The project remains on track for a 2025 start-up and is expected to produce more than 1 billion litres of renewable diesel annually to help meet strong demand under Canada’s Clean Fuel Regulations and reduce reliance on costly imports,” said Corson.

After more than a century, Imperial continues to be an industry leader in applying technology and innovation to responsibly develop Canada’s energy resources. As Canada’s largest petroleum refiner, a major producer of crude oil, a key petrochemical producer and a leading fuels marketer from coast to coast, our company remains committed to high standards across all areas of our business.

During the quarter, Imperial returned \$257 million to shareholders through dividend payments and declared a third quarter dividend of 50 cents per share. In June, Imperial renewed its annual normal course issuer bid program, allowing the company to repurchase up to five percent of its outstanding common shares over a 12-month period ending June 28, 2024.

“Imperial continues to demonstrate its long-standing commitment to returning surplus cash to shareholders and I am pleased to announce our plan to accelerate our NCIB share repurchases with a target of completing the program prior to year end,” said Corson.

After more than a century, Imperial continues to be an industry leader in applying technology and innovation to responsibly develop Canada's energy resources. As Canada's largest petroleum refiner, a major producer of crude oil, a key petrochemical producer and a leading fuels marketer from coast to coast, our company remains committed to high standards across all areas of our business.

Second quarter highlights

- **Net income of \$675 million or \$1.15 per share on a diluted basis**, compared to \$2,409 million or \$3.63 per share in the second quarter of 2022. Lower net income is primarily driven by lower commodity prices and increased planned turnaround activity.
- **Cash flows from operating activities of \$885 million**, compared to cash flows from operating activities of \$2,682 million in the same period of 2022. Cash flows from operating activities excluding working capital¹ of \$1,136 million, compared to \$2,783 million in the same period of 2022.
- **Capital and exploration expenditures totalled \$493 million**, up from \$314 million in the second quarter of 2022.
- **The company returned \$257 million to shareholders in the second quarter of 2023** through dividends paid.
- **Renewed share repurchase program**, enabling the purchase of up to five percent of common shares outstanding, a maximum of 29,207,635 shares, during the 12-month period ending June 28, 2024. Imperial plans to accelerate its share purchases under the NCIB program and anticipates repurchasing all remaining allowable shares prior to year end. Purchase plans may be modified at any time without prior notice.
- **Production averaged 363,000 gross oil-equivalent barrels per day**, compared to 413,000 gross oil-equivalent barrels per day in the same period of 2022. Lower production is primarily driven by the timing of planned turnaround activity at Syncrude, production and steam cycle timing at Cold Lake and the absence of unconventional volumes following the sale of XTO Energy Canada in the third quarter of 2022.
- **Total gross bitumen production at Kearl averaged 217,000 barrels per day** (154,000 barrels Imperial's share), compared to 224,000 barrels per day (159,000 barrels Imperial's share) in the second quarter of 2022.
- **Completed construction work on key mitigation efforts to expand the existing seepage interception system at Kearl**. Additional monitoring and assessment work will occur in the coming months. Imperial continues to engage with local Indigenous communities, and is providing site tours and access for independent testing. To date, there is no indication of adverse impacts to wildlife or fish populations in nearby river systems, or risks to drinking water for local communities.
- **First-ever delivery of renewable diesel to Kearl for use in mine fleet** as part of the company's ongoing effort to reduce emissions and demonstrate suitability for use in heavy equipment applications.
- **Gross bitumen production at Cold Lake averaged 132,000 barrels per day**, compared to 144,000 barrels per day in the second quarter of 2022. Lower production was primarily due to timing of production and steam cycles.
- **Finished drilling and completion of all wells and received final unit module for the Cold Lake Grand Rapids phase 1 (GRP1) project**. GRP1 will be the first solvent-assisted SAGD project in industry and is expected to reduce greenhouse gas emissions intensity by up to 40% compared to existing cyclic steam stimulation technology. The project remains on track to achieve accelerated start-up with steam injection anticipated by year end 2023.
- **The company's share of gross production from Syncrude averaged 66,000 barrels per day**, compared to 81,000 barrels per day in the second quarter of 2022, primarily driven by timing of planned turnaround activity.
- **Refinery throughput averaged 388,000 barrels per day**, compared to 412,000 barrels per day in the second quarter of 2022. Capacity utilization was 90 percent, compared to 96 percent in the second quarter of 2022, reflecting the impact of the planned Strathcona turnaround in the quarter.

¹ non-GAAP financial measure - see attachment VI for definition and reconciliation

- **Started facility construction of the Strathcona Renewable Diesel project, with key contractors mobilizing to site.** The project is designed to produce more than one billion litres of renewable diesel annually, primarily from locally sourced feedstocks, and could help reduce greenhouse gas emissions by about 3 million metric tonnes per year, as determined in accordance with Canada's Clean Fuel Regulations. Renewable diesel production expected to start in early 2025.
- **Petroleum product sales were 475,000 barrels per day**, compared to 480,000 barrels per day in the second quarter of 2022.
- **Chemical net income of \$71 million in the quarter**, up from \$53 million in the second quarter of 2022.
- **Early work continues on the foundational carbon storage hub project for the Pathways Alliance**, which is now working to obtain a carbon sequestration agreement from the Government of Alberta. Engineering and field work is underway to support a regulatory application later this year. Imperial is a founding member of the alliance, which continues to work collaboratively with both the Federal and Alberta governments on the policy and co-financing frameworks necessary to move the project forward.

Recent business environment

During the first half of 2023, the price of crude oil decreased as the global oil market saw higher inventory levels. In addition, the Canadian WTI/WCS spread continued to recover in the second quarter, but remains weaker than the first half of 2022. Refining margins declined on steady supply of diesel.

Operating results

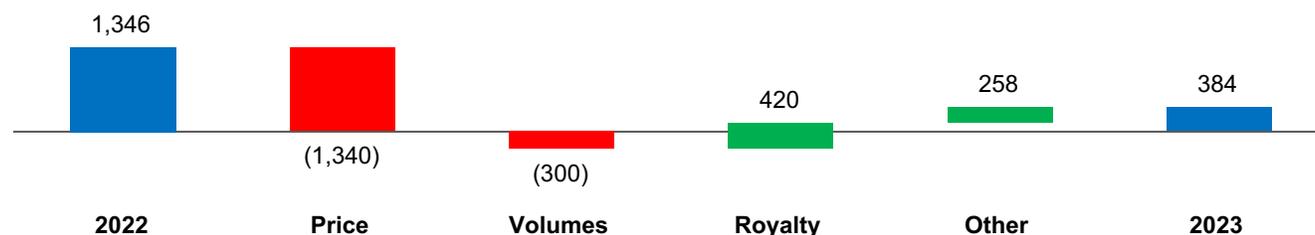

Second quarter 2023 vs. second quarter 2022

millions of Canadian dollars, unless noted	Second Quarter	
	2023	2022
Net income (loss) (U.S. GAAP)	675	2,409
Net income (loss) per common share, assuming dilution (dollars)	1.15	3.63

Upstream

Net income (loss) factor analysis

millions of Canadian dollars

Price – Lower bitumen realizations were primarily driven by lower marker prices and the widening WTI/WCS spread. Average bitumen realizations decreased by \$43.63 per barrel, generally in line with WCS, and synthetic crude oil realizations decreased by \$43.75 per barrel, generally in line with WTI.

Volumes – Lower volumes were primarily driven by the timing of planned turnaround activities at Syncrude, and production and steam cycle timing at Cold Lake.

Royalty – Lower royalties were primarily driven by weakened commodity prices.

Other – Includes favourable foreign exchange impacts of about \$180 million, and lower operating expenses of about \$130 million, resulting primarily from lower energy prices.

Marker prices and average realizations

Canadian dollars, unless noted	Second Quarter	
	2023	2022
West Texas Intermediate (US\$ per barrel)	73.56	108.52
Western Canada Select (US\$ per barrel)	58.49	95.80
WTI/WCS Spread (US\$ per barrel)	15.07	12.72
Bitumen (per barrel)	68.64	112.27
Synthetic crude oil (per barrel)	100.92	144.67
Average foreign exchange rate (US\$)	0.74	0.78

IMPERIAL OIL LIMITED

Production

thousands of barrels per day	Second Quarter	
	2023	2022
Kearl (Imperial's share)	154	159
Cold Lake	132	144
Syncrude (a)	66	81
Kearl total gross production (thousands of barrels per day)	217	224

(a) In the second quarter of 2023, Syncrude gross production included about 0 thousand barrels per day of bitumen and other products (2022 - 2 thousand barrels per day) that were exported to the operator's facilities using an existing interconnect pipeline.

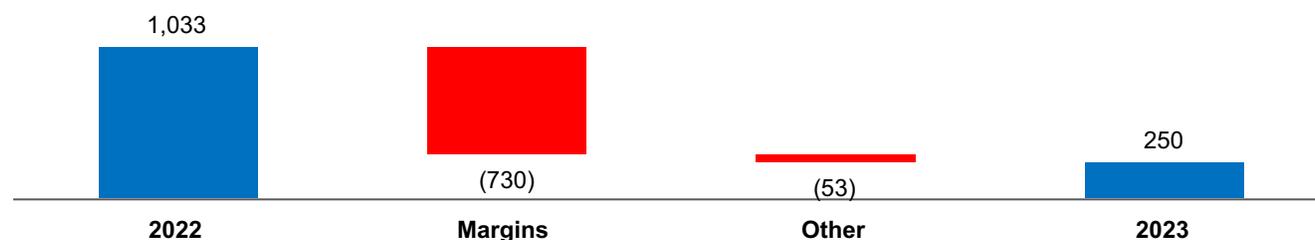

Lower production at Cold Lake was primarily driven by timing of production and steam cycles.

Lower production at Syncrude was primarily driven by the timing of the annual coker turnaround.

Downstream

Net income (loss) factor analysis

millions of Canadian dollars

Margins – Lower margins primarily reflect weaker market conditions.

Other – Includes higher turnaround impacts of about \$230 million, reflecting the planned turnaround activities at Strathcona refinery, partially offset by favourable foreign exchange impacts of about \$110 million.

Refinery utilization and petroleum product sales

thousands of barrels per day, unless noted	Second Quarter	
	2023	2022
Refinery throughput	388	412
Refinery capacity utilization (percent)	90	96
Petroleum product sales	475	480

Lower refinery throughput in the second quarter of 2023 reflects the impact of planned turnaround activities at the Strathcona refinery.

Chemicals

Net income (loss) factor analysis

millions of Canadian dollars

Corporate and other

millions of Canadian dollars

	Second Quarter	
	2023	2022
Net income (loss) (U.S. GAAP)	(30)	(23)

Liquidity and capital resources

millions of Canadian dollars

	Second Quarter	
	2023	2022
Cash flow generated from (used in):		
Operating activities	885	2,682
Investing activities	(489)	(230)
Financing activities	(263)	(2,734)
Increase (decrease) in cash and cash equivalents	133	(282)
Cash and cash equivalents at period end	2,376	2,867

Cash flow generated from operating activities primarily reflects lower Upstream realizations and Downstream margins.

Cash flow used in investing activities primarily reflects higher additions to property, plant and equipment, and lower proceeds from asset sales.

Cash flow used in financing activities primarily reflects:

	Second Quarter	
	2023	2022
millions of Canadian dollars, unless noted		
Dividends paid	257	228
Per share dividend paid (dollars)	0.44	0.34
Share repurchases (a)	—	2,500
Number of shares purchased (millions) (a)	—	32.5

(a) The company did not purchase shares during the second quarter of 2023. In the second quarter of 2022, share repurchases were made under the company's substantial issuer bid that commenced on May 6, 2022 and expired on June 10, 2022, and included shares purchased from Exxon Mobil Corporation by way of a proportionate tender to maintain its ownership percentage at approximately 69.6 percent.

On June 27, 2023, the company announced by news release that it had received final approval from the Toronto Stock Exchange for a new normal course issuer bid and will continue its existing share purchase program. The program enables the company to purchase up to a maximum of 29,207,635 common shares during the period June 29, 2023 to June 28, 2024. This maximum includes shares purchased under the normal course issuer bid and from Exxon Mobil Corporation concurrent with, but outside of, the normal course issuer bid. As in the past, Exxon Mobil Corporation has advised the company that it intends to participate to maintain its ownership percentage at approximately 69.6 percent. The program will end should the company purchase the maximum allowable number of shares or on June 28, 2024. Imperial plans to accelerate its share purchases under the normal course issuer bid program, and anticipates repurchasing all remaining allowable shares prior to year end. Purchase plans may be modified at any time without prior notice.

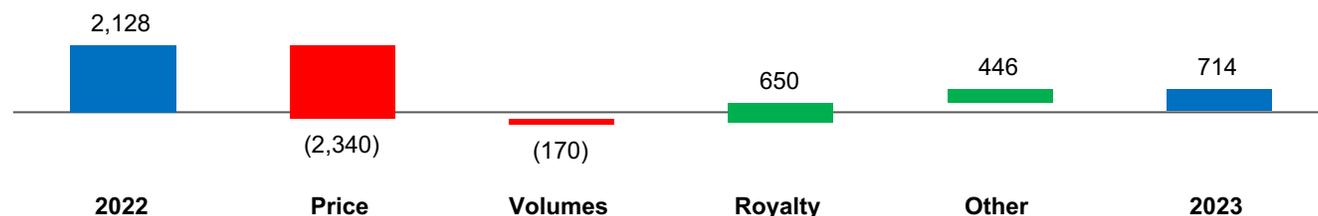

Six months 2023 vs. six months 2022

millions of Canadian dollars, unless noted	Six Months	
	2023	2022
Net income (loss) (U.S. GAAP)	1,923	3,582
Net income (loss) per common share, assuming dilution (dollars)	3.29	5.36

Upstream

Net income (loss) factor analysis

millions of Canadian dollars

Price – Lower bitumen realizations were primarily driven by lower marker prices and the widening WTI/WCS spread. Average bitumen realizations decreased by \$42.59 per barrel, generally in line with WCS, and synthetic crude oil realizations decreased by \$29.68 per barrel, generally in line with WTI.

Volumes – Lower volumes were primarily driven by the timing of planned turnaround activities at Syncrude, and production and steam cycle timing at Cold Lake, partially offset by the absence of extreme cold weather and reduced unplanned downtime at Kearl.

Royalty – Lower royalties were primarily driven by weakened commodity prices.

Other – Includes favourable foreign exchange impacts of about \$330 million, and lower operating expenses of about \$50 million.

Marker prices and average realizations

Canadian dollars, unless noted	Six Months	
	2023	2022
West Texas Intermediate (US\$ per barrel)	74.77	101.77
Western Canada Select (US\$ per barrel)	54.92	88.13
WTI/WCS Spread (US\$ per barrel)	19.85	13.64
Bitumen (per barrel)	58.94	101.53
Synthetic crude oil (per barrel)	101.73	131.41
Average foreign exchange rate (US\$)	0.74	0.79

IMPERIAL OIL LIMITED

Production

thousands of barrels per day	Six Months	
	2023	2022
Kearl (Imperial's share)	169	146
Cold Lake	137	142
Syncrude (a)	71	79
Kearl total gross production (thousands of barrels per day)	238	205

(a) In 2023, Syncrude gross production included about 1 thousand barrels per day of bitumen and other products (2022 - 2 thousand barrels per day) that were exported to the operator's facilities using an existing interconnect pipeline.

Higher production at Kearl was primarily driven by the absence of extreme cold weather, and reduced unplanned downtime as a result of the successful rollout of the winterization strategy.

Downstream

Net income (loss) factor analysis

millions of Canadian dollars

Margins – Lower margins primarily reflect weaker market conditions.

Other – Favourable foreign exchange impacts of about \$190 million and improved volumes of about \$110 million, partially offset by higher turnaround impacts of about \$250 million, reflecting the planned turnaround activities at Strathcona refinery.

Refinery utilization and petroleum product sales

thousands of barrels per day, unless noted	Six Months	
	2023	2022
Refinery throughput	403	406
Refinery capacity utilization (percent)	93	95
Petroleum product sales	465	464

Lower refinery throughput in 2023 reflects the impact of planned turnaround activities at the Strathcona refinery.

Chemicals

Net income (loss) factor analysis

Share repurchases (a)	—	2,949
Number of shares purchased (millions) (a)	—	41.4

(a) The company did not purchase shares during the six months ended June 30, 2023. In the six months ended June 30, 2022, share repurchases were made under the company's normal course issuer bid program and substantial issuer bid that commenced on May 6, 2022 and expired on June 10, 2022. Includes shares purchased from Exxon Mobil Corporation concurrent with, but outside of, the normal course issuer bid, and by way of a proportionate tender under the company's substantial issuer bid.

Key financial and operating data follow.

Forward-looking statements

Statements of future events or conditions in this report, including projections, targets, expectations, estimates, and business plans are forward-looking statements. Similarly, discussion of emission-reduction future plans to drive towards net-zero emissions are dependent on future market factors, such as continued technological progress and policy support, and represent forward-looking statements. Forward-looking statements can be identified by words such as believe, anticipate, intend, propose, plan, goal, seek, estimate, expect, future, continue, likely, may, should, will and similar references to future periods. Forward-looking statements in this report include, but are not limited to, references to the company's long-standing commitment to returning surplus cash to shareholders, including purchases under the normal course issuer bid and plans to accelerate completion prior to year end; anticipating strong production and throughput in the second half of 2023; the company's ongoing efforts to reduce emissions in its operations, including the impact of the use of renewable diesel at Kearl and demonstrating suitability for use in heavy equipment applications; the company's Strathcona renewable diesel project, including timing, expected production, strong demand, the ability to reduce reliance on costly imports, and the reduction to greenhouse gas emissions; additional monitoring and assessment activities at Kearl related to seepage and engagement with local indigenous communities; the impact and timing of the Cold Lake Grand Rapids phase 1 project, including reductions to greenhouse gas emissions intensity; and progress of the Pathways Alliance carbon storage hub, including obtaining a sequestration agreement and timing of a regulatory application.

Forward-looking statements are based on the company's current expectations, estimates, projections and assumptions at the time the statements are made. Actual future financial and operating results, including expectations and assumptions concerning demand growth and energy source, supply and mix; production rates, growth and mix across various assets; project plans, timing, costs, technical evaluations and capacities and the company's ability to effectively execute on these plans and operate its assets, including the Strathcona renewable diesel project; for shareholder returns, assumptions such as cash flow forecasts, financing sources and capital structure, participation of the company's majority shareholder and the results of periodic and ongoing evaluation of alternate uses of capital; the adoption and impact of new facilities or technologies on reductions to GHG emissions intensity, including but not limited to Strathcona renewable diesel, carbon capture and storage including in connection with hydrogen for the renewable diesel project, and any changes in the scope, terms, or costs of such projects; for renewable diesel, the availability and cost of locally-sourced and grown feedstock and the supply of renewable diesel to British Columbia in connection with its low-carbon fuel legislation; the amount and timing of emissions reductions, including the impact of lower carbon fuels; that any required support from policymakers and other stakeholders for various new technologies such as carbon capture and storage will be provided; performance of third party service providers; receipt of regulatory approvals in a timely manner; refinery utilization; applicable laws and government policies, including with respect to climate change, GHG emissions reductions and low carbon fuels; the ability to offset any ongoing inflationary pressures; capital and environmental expenditures; and commodity prices, foreign exchange rates and general market conditions could differ materially depending on a number of factors.

These factors include global, regional or local changes in supply and demand for oil, natural gas, and petroleum and petrochemical products and resulting price, differential and margin impacts, including foreign government action with respect to supply levels and prices, the impact of COVID-19 on demand and the occurrence of wars; availability and allocation of capital; the receipt, in a timely manner, of regulatory and third-party approvals, including for new technologies that will help the company meet its lower emissions goals; the results of research programs and new technologies, the ability to bring new technologies to commercial scale on a cost-competitive basis, and the competitiveness of alternative energy and other emission reduction technologies; failure or delay of supportive policy and market development for the adoption of emerging lower emission energy technologies and other technologies that support emissions reductions; political or regulatory events, including changes in law or government policy, environmental regulation including climate change and greenhouse gas regulation, and actions in response to COVID-19; unanticipated technical or operational difficulties; project management and schedules and timely completion of projects; availability and performance of third-party service providers; environmental risks inherent in oil and gas exploration and production activities; management effectiveness and disaster response preparedness; operational hazards and risks; cybersecurity incidents, including increased reliance on remote working arrangements; currency exchange rates; general economic conditions; and other factors discussed in Item 1A risk factors and Item 7 management's discussion and analysis of financial condition and results of operations of Imperial Oil Limited's most recent annual report on Form 10-K and subsequent interim reports.

Forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties, some that are similar to other oil and gas companies and some that are unique to Imperial Oil Limited. Imperial's actual results may differ materially from those expressed or implied by its forward-looking statements and readers are cautioned not to place undue reliance on them. Imperial undertakes no obligation to update any forward-looking statements contained herein, except as required by applicable law.

Forward-looking and other statements regarding Imperial's environmental, social and other sustainability efforts and aspirations are not an indication that these statements are necessarily material to investors or requiring disclosure in the company's filings with securities regulators. In addition, historical, current and forward-looking environmental, social and sustainability-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future, including future rule-making. Individual projects or opportunities may advance based on a number of factors, including availability of supportive policy, technology for cost-effective abatement, company planning process, and alignment with our partners and other stakeholders.

In this release all dollar amounts are expressed in Canadian dollars unless otherwise stated. This release should be read in conjunction with Imperial's most recent Form 10-K. Note that numbers may not add due to rounding.

The term "project" as used in this release can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.

Year	1,923	3.29

(a) Computed using the average number of shares outstanding during each period. The sum of the quarters presented may not add to the year total.

Free cash flow

Free cash flow is a non-GAAP financial measure that is cash flows from operating activities less additions to property, plant and equipment and equity company investments plus proceeds from asset sales. The most directly comparable financial measure that is disclosed in the financial statements is "Cash flows from (used in) operating activities" within the company's Consolidated statement of cash flows. This measure is used to evaluate cash available for financing activities (including but not limited to dividends and share purchases) after investment in the business.

Reconciliation of free cash flow

millions of Canadian dollars	Second Quarter		Six Months	
	2023	2022	2023	2022
From Imperial's Consolidated statement of cash flows				
Cash flows from (used in) operating activities	885	2,682	64	4,596
Cash flows from (used in) investing activities				
Additions to property, plant and equipment	(499)	(333)	(928)	(637)
Proceeds from asset sales	9	102	23	126
Loans to equity companies - net	1	1	2	2
Free cash flow	396	2,452	(839)	4,087

Net income (loss) excluding identified items

Net income (loss) excluding identified items is a non-GAAP financial measure that is total net income (loss) excluding individually significant non-operational events with an absolute corporate total earnings impact of at least \$100 million in a given quarter. The net income (loss) impact of an identified item for an individual segment in a given quarter may be less than \$100 million when the item impacts several segments or several periods. The most directly comparable financial measure that is disclosed in the financial statements is "Net income (loss)" within the company's Consolidated statement of income. Management uses these figures to improve comparability of the underlying business across multiple periods by isolating and removing significant non-operational events from business results. The company believes this view provides investors increased transparency into business results and trends, and provides investors with a view of the business as seen through the eyes of management. Net income (loss) excluding identified items is not meant to be viewed in isolation or as a substitute for net income (loss) as prepared in accordance with U.S. GAAP. All identified items are presented on an after-tax basis.

Reconciliation of net income (loss) excluding identified items

There were no identified items in the second quarter or year-to-date 2023 and 2022.

Cash operating costs (cash costs)

Cash operating costs is a non-GAAP financial measure that consists of total expenses, less purchases of crude oil and products, federal excise taxes and fuel charge, financing, and costs that are non-cash in nature, including depreciation and depletion, and non-service pension and postretirement benefit. The components of cash operating costs include "Production and manufacturing", "Selling and general" and "Exploration" from the company's Consolidated statement of income, and as disclosed in Attachment III of this document. The sum of these income statement lines serve as an indication of cash operating costs and does not reflect the total cash expenditures of the company. The most directly comparable financial measure that is disclosed in the financial statements is "Total expenses" within the company's Consolidated statement of income. This measure is useful for investors to understand the company's efforts to optimize cash through disciplined expense management.

Reconciliation of cash operating costs

Corporate / Eliminations	24	16	27	71
Cash operating costs	1,992	2,100	3,935	3,986

Unit cash operating cost (unit cash costs)

Unit cash operating costs is a non-GAAP ratio. Unit cash operating costs (unit cash costs) is calculated by dividing cash operating costs by total gross oil-equivalent production, and is calculated for the Upstream segment, as well as the major Upstream assets. Cash operating costs is a non-GAAP financial measure and is disclosed and reconciled above. This measure is useful for investors to understand the expense management efforts of the company's major assets as a component of the overall Upstream segment. Unit cash operating cost, as used by management, does not directly align with the definition of "Average unit production costs" as set out by the U.S. Securities and Exchange Commission (SEC), and disclosed in the company's SEC Form 10-K.

Components of unit cash operating cost
