

## Product Data Sheet

# ESSO BANDSAW LUBE

LUBRICANT FOR PROFESSIONAL BAND SAWS

December 2006

ESSO BANDSAW LUBE is a custom-engineered lubricant created specifically for the lubrication of band saws. The built Performance Features into the formulation offer maximum lubricant performance and controlled waste.

- ◆ Easy mist generation
- ◆ Stray-mist control
- ◆ Anti-rust
- ◆ Reduced lubricant consumption

### Performance Features

ESSO BANDSAW LUBE is custom engineered for band saws to easily form oil in air mists that are stable in pipes and lines normally associated with mist lubrication systems.

ESSO BANDSAW LUBE is enriched with polymers, which control excessive misting in the work area. This contributes to cleaner work areas, reduced lubricant consumption - and a cleaner environment.

ESSO BANDSAW LUBE contains powerful inhibitors that protect expensive equipment against rusting.

### Precautions

ESSO BANDSAW LUBE is manufactured from quality petroleum base stocks, blended with selected additives. As with all petroleum products, good personal hygiene and careful handling should always be practiced. Avoid prolonged contact with the skin, splashing into the eyes, ingestion, or vapour inhalation. Please refer to the Esso Material Safety Data Sheet for further information.

Note: This product is not controlled under Canadian WHMIS legislation.

### Typical Properties

Colour, ASTM	1.0
Flash Point, °C, min.	200
Pour Point, °C, max.	-30
Kinematic Viscosity, cSt @ 40°C	38

*The above information represents typical manufacturing properties. Some are controlled by manufacturing specifications while others are not. All may vary moderately from the values given.*
