NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

1. Basis of financial statement preparation

These unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles of the United States of America and follow the same accounting policies and methods of computation as, and should be read in conjunction with, the most recent annual consolidated financial statements filed with the U.S. Securities and Exchange Commission in the company's 2011 Annual Report on Form 10-K. In the opinion of the company, the information furnished herein reflects all known accruals and adjustments necessary for a fair statement of the results for the periods reported herein. All such adjustments are of a normal recurring nature. The company's exploration and production activities are accounted for under the "successful efforts" method.

The results for the nine months ended September 30, 2012, are not necessarily indicative of the operations to be expected for the full year.

All amounts are in Canadian dollars unless otherwise indicated.

	17	12	11	(23)

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OPERATING RESULTS

The company's net income for the third quarter of 2012 was \$1,040 million or \$1.22 a share on a diluted basis, compared with \$859 million or \$1.01 a share for the same period last year. Net income for the first nine months of 2012 was \$2,690 million or \$3.16 a share on a diluted basis, versus \$2,366 million or \$2.77 a share for the first nine months of 2011.

Higher third quarter earnings were primarily attributable to higher mid-continent industry refining margins of about \$270 million partially offset by lower Syncrude and natural gas realizations of about \$75 million. Earnings in the third quarter of 2012 were also impacted by higher Kearn production readiness expenditures of about \$30 million.

For the first nine months, earnings increased primarily due to stronger industry refining margins of about \$700 million and lower royalty costs of about \$160 million. These factors were partially offset by the impacts of lower Upstream realizations of about \$325 million, lower Upstream volumes of about \$85 million and higher refinery planned maintenance of about \$80 million. Year-to-date earnings in 2012 were also impacted by higher Kearn production readiness expenditures of about \$60 million.

Upstream

Net income in the third quarter was \$498 million versus \$534 million in the same period of 2011. Earnings decreased primarily due to lower Syncrude and natural gas realizations of about \$75 million, lower Cold Lake production of about \$40 million and higher Kearn production readiness expenditures of about \$30 million. These factors were partially offset by lower royalty costs of about \$60 million, higher Syncrude and conventional volumes of about \$60 million, the latter primarily due to the absence of third-party pipeline downtime which significantly reduced conventional production in 2011.

Net income for the first nine months of 2012 was \$1,400 million versus \$1,686 million from 2011. Earnings were lower primarily due to the impacts of lower realizations of about \$325 million, lower Syncrude and Cold Lake volumes of about \$140 million largely as a result of increased planned maintenance and higher Kearn production readiness expenditures of about \$60 million. These factors were partially offset by lower royalty costs of about \$160 million, the impact of a weaker Canadian dollar of about \$70 million and higher conventional volumes of about \$50 million.

Prices for most of the company's liquids production are based on West Texas Intermediate (WTI) crude oil, a common benchmark for mid-continent North American oil markets. Compared to the corresponding periods last year, the average WTI crude price in U.S. dollars was higher by \$2.66 a barrel or about three percent in the third quarter of 2012 and essentially unchanged in the first nine months of 2012. The company's Syncrude realizations were impacted by market discounts caused by supply/demand imbalances in mid-continent North America. For the third quarter and in the first nine months of 2012, Syncrude realizations in Canadian dollars decreased by about eight percent and seven percent, respectively, compared to the corresponding periods last year. The company's average bitumen realizations in Canadian dollars increased in the third quarter and in the first nine months of 2012 in line with WTI. The company's average realizations on natural gas sales were lower by about 39 percent and 43 percent in the third quarter and in the first nine months of 2012, respectively, in line with the decline in the average of 30-day spot prices for natural gas in Alberta.

Gross production of Cold Lake bitumen averaged 152 thousand barrels a day during the third quarter, versus 162 thousand barrels in the same period last year. For the first nine months of this year, gross production was 154 thousand barrels a day, compared with 159 thousand barrels in the same period of 2011. Lower volumes in both periods were primarily due to higher planned maintenance activities in 2012 along with the cyclic nature of production at Cold Lake.

The company's share of Syncrude's gross production in the third quarter was 78 thousand barrels a day, versus 75 thousand barrels in the third quarter of 2011. Higher volumes were primarily the result of lower planned maintenance activities in the third quarter of 2012 partially offset by the negative impact of weather on the mine operations in mid-September. During the first nine months of the year, the company's share of gross production from Syncrude averaged 70 thousand barrels a day, down from 75 thousand barrels in 2011. Higher planned maintenance activities were the main contributor to the lower production.

Gross production of conventional crude oil averaged 19 thousand barrels a day in the third quarter and 20 thousand barrels a day the first nine months of the year, up from the 12 thousand barrels and 17 thousand barrels, respectively, in the corresponding periods in 2011 when third-party pipeline downtime significantly reduced production at the Norman Wells field.

Gross production of natural gas during the third quarter of 2012 was 188 million cubic feet a day, down from 252 million cubic feet in the same period last year. In the first nine months of the year, gross production was 194 million cubic feet a day, down from 259 million cubic feet in the first nine months of 2011. The lower production volume in both periods was primarily a result of the producing properties divestments.

Downstream

Net income was \$536 million in the third quarter, \$264 million higher than the third quarter of 2011. First nine months net income was \$1,223 million, an increase of \$611 million over 2011. Both the third quarter and nine month earnings for 2012 were the best quarterly and year-to-date earnings on record.

Higher third quarter 2012 earnings were primarily driven by solid refining operations that captured strong mid-continent refining margins. Mid-continent North America industry refining margins continued to be strong in the third quarter of 2012. The overall cost of crude oil processed at three of the company's four refineries followed the trend of WTI prices and Western Canadian crude oils. Canadian wholesale prices of refined products are largely determined by wholesale prices in adjacent U.S. regions, where wholesale prices are predominately tied to international product markets. Stronger industry refining margins are the result of the widened differential between product prices and cost of crude oil processed.

Higher nine months earnings were primarily due to stronger industry refining margins of about \$700 million. This factor was partially offset by the unfavourable impact of a higher level of refinery planned maintenance activities compared with 2011 totalling about \$80 million.

Chemical

Net income was \$37 million in the third quarter, unchanged from the same quarter last year. Nine months net income was \$121 million, up \$10 million from 2011. Strong operating performance along with higher polyethylene sales volumes and margins were the main contributors to the increase on a year-to-date basis.

Corporate and Other

Net income effects from Corporate & Other were negative \$31 million in the third quarter, compared with \$16 million in the same period of 2011. For the nine months of 2012, net income effects from Corporate & Other were negative \$54 million, versus negative \$43 million last year.

LIQUIDITY AND CAPITAL RESOURCES

Cash flow generated from operating activities was \$669 million in the third quarter, a decrease of \$989 million from the corresponding period in 2011. Lower cash flow in the third quarter was primarily due to the timing of scheduled income tax payments and inventory builds partially offset by higher net income. Year-to-date cash flow generated from operating activities was \$3,033 million, compared with \$3,273 million in the same period last year. Lower cash flow was primarily due to working capital effects partially offset by higher net income.

Investing activities used net cash of \$1,318 million in the third quarter, compared with \$1,061 million in the same period of 2011. Additions to property, plant and equipment were \$1,388 million in the third quarter, compared with \$1,087 million during the same quarter 2011. Expenditures during the quarter were primarily directed towards the advancement of Kearl initial development and expansion. At the end of the third quarter of 2012, the Kearl initial development and expansion were 98 percent and 20 percent complete, respectively. Other investments included advancing the Nabiye expansion project at Cold Lake and environmental and efficiency projects at Syncrude.

Cash from financing activities was \$122 million in the third quarter, compared with cash used in financing activities of \$96 million in the third quarter of 2011. In the third quarter, the company increased its long-term debt level by \$150 million by drawing on an existing facility and issued additional commercial paper which increased short-term debt by \$75 million. Dividends paid in the third quarter of 2012 were \$102 million, \$9 million higher than the corresponding period in 2011. Per-share dividends declared in the first nine months of 2012 totaled \$0.36, up from \$0.33 in the same period of 2011.

The above factors led to a decrease in the company's balance of cash to \$469 million at September 30, 2012, from \$1,202 million at the end of 2011.

Imperial Oil is currently evaluating the opportunity to participate up to 50% in the \$3.1 billion purchase of Celtic Exploration Limited announced by ExxonMobil Canada on October 17, 2012.

KEARL INITIAL DEVELOPMENT PROJECT UPDATE

At the end of the third quarter of 2012, Kearl initial development was 98 percent complete, with construction 96 percent complete.

Phased start-up activities currently progressing towards the planned start of production around year-end 2012:

- All equipment modules have been set in place at the Kearl site. The issues associated with the transportation of modules, constructed in South Korea and moved through the United States, have been addressed through construction re-sequencing.
- The operating organization is fully staffed and trained.
- Mining operations have commenced and ore is being stockpiled adjacent to the ore processing plant, which is being commissioned.
- Commissioning of the utilities systems is well advanced.
- Bitumen processing facilities (which use a proprietary process that eliminates the need for an upgrader) are being readied for the introduction of solvent.
- Diluent and natural gas supply systems are operational.
- A new diluted bitumen pipeline connecting to markets is being commissioned.

Start-up of an operation of this size and scope is a sequential process and good progress towards first oil continues.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Information about market risks for the nine months ended September 30, 2012 does not differ materially from that discussed on page 23 in the company's Annual Report on Form 10-K for the year ended December 31, 2011 and Form 10-Q for the quarter ended June 30, 2012.

Item 4. Controls and Procedures.

As indicated in the certifications in Exhibit 31 of this report, the company's principal executive officer and principal financial officer have evaluated the company's disclosure controls and procedures as of September 30, 2012. Based on that evaluation, these officers have concluded that the company's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the company in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to them in a manner that allows for timely decisions regarding required disclosures and are effective in ensuring that such information is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There has not been any change in the company's internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Issuer Purchases of Equity Securities

Period	(a) Total number of shares (or units) purchased	(b) Average price paid per share (or unit)	(c) Total number of shares (or units) purchased as part of publicly announced plans or programs	(d) Maximum number (or approximate dollar value) of shares (or units) that may yet be purchased under the plans or programs
July 2012 (July 1- July 31)	0	0	0	42,263,212
August 2012 (Aug 1 – Aug 31)	0	0	0	42,182,960
September 2012 (Sept 1 – Sept 30)	0	0	0	42,107,157

On June 21, 2012, the company announced by news release that it had received final approval from the Toronto Stock Exchange for a new normal course issuer bid and will continue its share repurchase program. The new program enables the company to repurchase up to a maximum of 42,379,951 common shares, including common shares purchased for the company's employee savings plan, the company's employee retirement plan and from Exxon Mobil Corporation during the period June 25, 2012 to June 24, 2013. If not previously terminated, the program will end on June 24, 2013.

The company will continue to evaluate its share purchase program in the context of its overall capital activities.

Item 6. Exhibits.

(31.1) Certification by the principal executive officer of the company pursuant to Rule 13a-14(a).

(31.2) Certification by the principal financial officer of the company pursuant to Rule 13a-14(a).

(32.1) Certification by the chief executive officer and of the company pursuant to Rule 13a-14(b) and 18 U.S.C. Section 1350.

(32.2) Certification by the chief financial officer and of the company pursuant to Rule 13a-14(b) and 18 U.S.C. Section 1350.

SIGNATURES

Pursuant to the requirements of the *Securities Exchange Act* of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CERTIFICATIONS

I, Bruce H. March, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Imperial Oil Limited;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
