

November 2015

Nanticoke Refinery - Reduction plan summary (OR 455/09)

Provincial regulations set out requirements for business owners to inform Ontarians about the use and creation of reportable substances in their communities. Under the Toxics Reduction Act (TRA), companies are required to develop reduction plans for prescribed substances.

Petroleum refineries process crude oil to manufacture finished products, such as gasoline and heating oil, that are used and valued by our society. Crude oil may contain varying quantities of the substances covered under the TRA. Through the tightly controlled multi-step refinery operation, a variety of substances are used, created and transformed within contained piping and vessels. Finished products are regulated for both content (sulphur levels, for example) and use (pollution controls and higher mileage vehicles). In addition, Imperial Oil has comprehensive programs in place at all its facilities to reduce waste, to prevent spills and leaks, to reduce fugitive emissions, and to train personnel on the environmental responsibilities of their role.

The following summary of the reduction plan has been prepared in accordance with Section 8 of the TRA and the requirements of Section 24 of Ontario Regulation 455/09, as amended from time to time. The summary accurately reflects the current version of the plan.

In 2015, Nanticoke refinery prepared a new plan for the following substance:

Isopropyl Alcohol

The following substances also required plans in 2015 under subsection 3(1) of the Act based on 2014 toxic substance quantifications. These plans were prepared in previous years and remain valid in 2015.

- Ammonia (total)
- Antimony (and its compounds)
- Benzene
- Cresol (all isomers, and their salts)
- Cyclohexane
- Diethanolamine (and its salts)
- Ethylbenzene
- Ethylene
- HCFC-22
- n-Hexane
- Hydrochloric acid
- Hydrogen sulphide
- Methanol
- Naphthalene
- Nitrate ion
- Phenol (and its salts)
- Propylene
- Sulphuric acid
- Tetrachloroethylene
- Toluene

- Total reduced sulphur
- Trimethylbenzene, 1,2,4-
- Xylene (all isomers)
- Mercury (and its compounds)
- Cadmium (and its compounds)
- Lead (and its compounds)
- Selenium (and its compounds)
- Acenaphthene
- Acenaphthylene
- Fluorene
- Phenanthrene
- Pvrene
- Carbon monoxide
- Nitrogen oxides (expressed as nitrogen dioxide)
- PM2.5
- PM10
- Sulphur dioxide
- Total particulate matter
- Propane

- Butane (all isomers)
- Butene (all isomers)
- Cycloheptane
- Cyclooctane
- Decane (all isomers)
- Heptane (all isomers)

- Hexane
- Hexene (all isomers)
- Noname (all isomers)
- Octane (all isomers)
- Pentane (all isomers)
- Trimethylbenzene

Description of Target

Reasons for Use

Why is the toxic substance used at the facility?: *

As a physical or chemical processing aid

Summarize why the toxic substance is used at the facility: **

Isopropyl alcohol is added as a demulsifier in the alkylation unit (ALKY), a corrosion inhibitor in the fluid catalyst cracking unit (FCCU) and as a conductivity enhancer in the tank farm.

Reasons for Creation

Why is the toxic substance created at the facility?: *

This substance is not created at the facility

Summarize why the toxic substance is created at the facility: **

Toxic Reduction Options for Implementation

Description of the toxic reduction option(s) to be implemented

Is there a statement that no option will be implemented?: *

Yes, we are not implementing

If you answered "No" to this question, please add the option(s) under the appropriate Toxic Substance Reduction Categories (e.g. Materials or feedstock substitution, Product design or reformulation, etc.). If you answered "Yes" please provide an explanation below why your facility is not implementing an option. Explanation of the reasons why no option will be implemented: **

No technically and economically feasible options were identified that would be expected to reduce the use of isopropyl alcohol at the facility. As such, Imperial Oil does not intend to implement any options to reduce the use of isopropyl alcohol at the Nanticoke Refinery.

9. TOXIC REDUCTION PLAN CERTIFICATION

Highest Ranking Employee
As of December 1, 2015. I, Shawn Kuntz, certify that I have read the toxic substance
reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the plan is factually accurate and complies with the <i>Toxics Reduction Act</i> , 2009 and Ontario Regulation 455/09 (General) made under that Act.
• 67-63-0 Isopropyl alcohol
Shawn Kuntz Date Refinery Manager, Nanticoke Refinery
Toxic Substance Reduction Planner
As of October 22, 2015, I, Scott Manser certify that I am familiar with the processes Date Planner Name at Imperial Oil's Nanticoke Refinery that use or create the toxic substances referred to below, that I agree with the estimates referred to in subparagraphs 7 iii, iv and v of subsection 4 (1) of the <i>Toxics Reduction Act</i> , 2009 that are set out in the plan dated October 22, 2015 and that the plan complies with that Act and Ontario Regulation 455/09 (General) made under that Act.
