Sept. 16, 2019

Dear Neighbour,

Imperial provides a significant portion of gasoline, diesel and jet fuel to Mississauga and the Greater Toronto and Hamilton Area through its Sarnia Products Pipeline. As part of an ongoing maintenance program, Imperial proactively replaced a 600m portion of the pipeline in Mississauga this year. The work was a preventative measure to install the replacement pipeline deep below the Credit River in order to mitigate changing river flows and potential impacts on the line.

We would like to thank the community for its patience and collaboration as we completed this work earlier this year. We are pleased to report that the construction phase of Imperial's Credit River Valley Project has been completed safely and on schedule. The new pipeline has been installed deep below the river and is now in service. The worksites at the Credit River have been demobilized and full site restoration is expected to be complete this fall.

Credit River Valley Project Location

Imperial made every effort to limit its construction footprint and proactively communicate with residents to minimize disruption to the community. This included a focus on safety for workers and members of the public, coordination of work to limit traffic and noise, and continued engagement with local governments and conservation authorities to comply with all environmental requirements.

Again, we greatly appreciate the local community's patience during this important infrastructure project and feedback provided at our neighbourhood information session in spring 2018. Completion of this project is part of Imperial's commitment to safe and reliable operations in Mississauga and the Greater Toronto and Hamilton Area.

If you would like to learn more about Imperial's Credit River Valley Project, please contact us at questions@imperialon.ca or 416-586-1918. You can also visit our project website at imperialoil.ca/creditriver.

Sincerely,

A handwritten signature in black ink, appearing to be "CT".
