

IMPERIAL'S SARNIA PRODUCTS PIPELINE WATERDOWN TO FINCH PROJECT

NOTICE OF STUDY COMMENCEMENT AND INFORMATION SESSIONS

Description of Project:

Imperial's Sarnia Products Pipeline provides gasoline, diesel and jet fuel for households and businesses across the Greater Toronto and Hamilton Area. To support continued safety and reliability, Imperial plans to replace approximately 63-kilometres of pipeline between Imperial's Waterdown pump station and the company's terminal in Toronto's North York. Imperial will replace the 12-inch pipeline with a 12-inch pipeline.

Imperial wants to share project details and answer questions at our community information sessions in the summer and fall of 2018.

The Process:

Imperial has commenced the environmental and route planning study process in accordance with the requirements of the Ontario Energy Board's Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines and Facilities in Ontario. The study will analyze pipeline routing, describe the natural and social components of the environment, outline safety measures, and include proposed mitigation and monitoring measures.

In addition to working with the regulatory bodies and different levels of government on technical, safety and environmental approvals, Imperial is engaging with the Ontario Pipeline Coordinating Committee, which is comprised of government agencies that have a role in the review of the project. Results from the study, including the preparation of the Environmental Report and an Indigenous Consultation Report, will be filed with the Ontario Energy Board as part of Imperial's leave to construction application in 2019.
