

## **O. Reg. 88/22: Air Pollution – Discharge of Sulphur Dioxide from Petroleum Facilities**

### **Liquid Fuel Use –January 20 and 21, 2024**

**Nanticoke Refinery, Imperial Oil**

**March 18, 2024**

## Introduction

Pursuant to subsection 41(1) paragraph 4 of O. Reg 88/22, Imperial Oil is making available to the public information relating to liquid fuel use at the Nanticoke Refinery (see Table 1).

Table 1: Information Relating to Liquid Fuel Use at the Nanticoke Refinery

| O. Reg 88/22 Requirement  | Imperial Oil Information  |
|---|---|
| Date(s) on which the liquid fuel was used in the combustion device(s)   | January 20 and 21, 2024   |
| Written confirmation from the supplier of natural gas that the supply to the facility is restricted   | Please refer to Attachment A  |
| Measures that are available to prevent or reduce the risk of liquid fuel being used in the combustion device in similar circumstances in the future | When the supply of natural gas is restricted by the supplier, Imperial maximizes the use of all other alternate available fuels to prevent or minimize the use of liquid fuel during the restriction period. This includes the vaporization of available liquefied petroleum gas (LPG). |

---

Theresa:

... just following up with additional changes to the overrun request as we have now made some additional changes from the email on Saturday Jan 13<sup>th</sup>.

- Gas Control is **unable** to authorize overrun for the period of January 15<sup>th</sup> at 10:00 am EST through to January 18<sup>th</sup> at 10:00 am EST.
- Gas Control approves the overrun request from 10 am January 18<sup>th</sup> to 10 am January 19<sup>th</sup>.
- Gas Control is **unable** to authorize overrun for the period January 19<sup>th</sup> at 10:00 am EST through to January 21<sup>st</sup> at 10:00 am EST.

Gas Control approves the overrun request from 10 am Jan 21<sup>st</sup> to 10 am January 30<sup>th</sup>. We will notify you immediately if the approval must be rescinded due to changing weather forecasts or other operational constraints.

If you have any questions regarding the above please let us know.

Thanks,

**Dennis Martin**
