

TU-LUGE

Aquatic Effects Monitoring Program (AEMP)

February 2026

Imperial had been conducting an Aquatic Effects Monitoring Program as per Sahtu Land and Water Board Requirements.

Program consists of a **Surface Water Monitoring program** and **Small Fish Study component**.

Upcoming in 2026

Ongoing water sampling Mar-Sept

February

- Large Fish Study Memo available for review

April/May

- AEMP Indoor Learning Session, review of 2025 program results and preparation for Fall 2026 program – *In community*
- Submission of 2025 AEMP Annual Report to SLWB
- Submission of AEMP Plan (Version 5) to SLWB

September

- Fish Together – AEMP Field Sessions – *In community*

THANK YOU

In September 2025, the TU-LUGE Working Group held Meeting #3 and agreed to proceed with addition of Large Fish Study Activities

As part of the working group meeting:

- Imperial/TRSA biologists, SLWB, elders, community members and school children in Fort Good Hope dissected and shared knowledge on fish health from the Mackenzie River.

WE NEED YOU

Please submit your community fish health observations to ImperialNormanWellsAEMP@worley.com
